

Satchel Pulse's Skills solution's alignment to the Guiding Principles of California's Career Technical Education (CTE)

CTE Guiding Principle	 Skills
Inclusion	<input checked="" type="checkbox"/> We provide high-quality, targeted resources for all students to improve the critical life skills modern day employers seek.
Students and the economy	<input checked="" type="checkbox"/> Teaching students the skills employers are looking for increases the chances of employability and economic contribution.
Preparation for success	<input checked="" type="checkbox"/> Our resources include lessons, self-studies, and interventions to specifically help students improve their decision-making and interpersonal skills. We align 100% with CASEL to get all young learners ready for college, career, and beyond.
Career planning and management	<input checked="" type="checkbox"/> Real skills learning happens in practice, not just on paper. Our resources encourage students to actively practice their new social emotional skills so that they're sufficiently developed before entering the workforce.
Integration	<input checked="" type="checkbox"/> Our resources show social emotional skills in real-world situations to promote true understanding and encourage practice. They are all written and created by our team of seasoned educators and SEL experts.
Programs of study	<input checked="" type="checkbox"/> Strong skills in areas such as responsibility and self-management developed in school can encourage students to grow into lifelong learners. Strong life skills set students up for success in all aspects of their life - whatever success may mean to them.
Innovation and quality	<input checked="" type="checkbox"/> Our team is committed to creating high-quality, research-based resources to help all K-12 students. Our content library is frequently updated and enhanced to ensure continuous improvements.
Future orientation	<input checked="" type="checkbox"/> The skills we nurture are vital to thrive in our modern, ever-changing society. They also encourage young learners to think outwardly and reflect on the role they play in their local communities, nation, and wider world.
Collaboration	<input type="checkbox"/>
